

Quality Products, Real Results

**Solving application issues
can prove challenging
without quality products
or expert service.**

Emerson Process Management is proud to offer EIM and other state-of-the-art valve automation products to keep your plant running smoothly. Scallon Controls, your Emerson Process Management local business partner, is the sole provider of these products and the technical services necessary to support them in the Golden Triangle. Our professionals have the training and expertise to help you obtain real results and maintain reliable, efficient operations.

INNOVATIVE AND EXCEPTIONAL

Emerson and EIM have an elite reputation for high functioning products. For over sixty years, EIM has developed and patented basic designs that are now standard throughout the valve actuator industry, including:

- Torque switch protection for both open and closed travel
- Top entry replaceable stem nut to allow easy installation and replacement
- Reversing starter integral to actuator switch compartment
- Automatic declutching hand wheel vital for safety
- 4–20mA analog modulating controls
- Digital network control system

As EIM continues to innovate, offering valve actuators for virtually any application, Scallon Controls will continue to provide the exceptional service our industrial customers have come to expect.

24/7 Scallon Solutions Line:

PROVEN PERFORMANCE

Known for rugged construction and long-term reliability, EIM actuators consistently exceed user expectations of superior performance and long operating life. EIM's ISO 9001 certification demonstrates a commitment to excellence today, and continued improvement in the future. Scallon's highly skilled and dedicated staff reflects this meticulous attention to quality in the work we provide on:

- Electric Actuators
- Pneumatic Actuators
- Actuator Controls
- Network Controls
- Manual Actuators

Not only are we the sole industrial distributor and service provider in the Golden Triangle for Emerson's elite EIM product line, but we also have the capability to maintain other manufacturer platforms.

TRUSTED SERVICE

As your Emerson Process Management local business representative since 1977, Scallon Controls has been a dependable partner for superior products, personalized service, systems integration, and expert solutions to the process industry. Our trained technicians confirm your assets are properly maintained for optimal operation. With access to original equipment manufacturer (OEM) specifications, the latest technical drawings, and most current engineering updates, we can assure high quality performance for a breadth of products in your plant. When you call on us, you can be certain the right parts are used and critical support meets or exceeds current standards through our comprehensive offering.

Contact us for more information on how we can help present quality product and real service solutions to you.
