

Control Systems, PLC Services, & Panel Fabrication

Quality Products. Real Results.

Scallon Controls offers highly integrated predictive intelligence products for your control system. Through a variety of equipment options, you can solve plant challenges by connecting your people, processes, and production using digital plant architecture.

Emerson's DeltaV, DeltaV SIS, and new DeltaV S-series Electronic Marshalling technology delivers flexibility and scalability to provide a wealth of diagnostics information to the system while enhancing plant performance. Conversion to Emerson's PlantWeb digital plant architecture has been proven to help plants achieve up to 30% capital and engineering savings and 2% gains in operating efficiency, including nearly a 40% improvement in maintenance inefficiencies.

- I/O on Demand
- Ultimate Scalability
- Embedded Intelligent Control

Scallon Controls' experts can program and integrate any PLC system using quality products designed to work together to provide time savings, cost savings and faster start-ups. By employing our services from initial conception to ongoing maintenance, we can help you see real results in your plant.

Innovative Integration. Exceptional Service.

Whether you need just one operation or a complete system maintenance contract, Scallon Controls can provide a range of services for your plant's onsite control systems.

- Project Management and System Integration
- Installation and Start-up
- Local On-site Maintenance
- Lifecycle Support Services
- System and Application Administration
- Field Instrumentation Support

We can provide turnkey panel design using your specifications and materials or complete fabrication with everything you need. We specialize in the design and assembly of custom industrial control panels; focusing on automation, electrical controls, and system integration in conjunction with fabrication.

From a small panel to a large scale Remote Instrument Enclosure (RIE) building, we offer a full range of services and capabilities, including:

- Control System Design
- Specification
- Drawing Packages
- Fabrication
- Testing
- Installation and Start-up Services

Our experience and knowledge of industrial standards allow us to produce pneumatic, electrical, electronic or hybrid control panels that are dependable, practical, and maintainable. By devising flexible solutions for your control system needs, Scallon Controls provides innovative integration and exceptional service to meet or exceed your goals.

Real Solutions. Reliable Support.

Real people mean real results.
Call the Scallon Solutions Line
at 409-842-5950 and you'll
get answers from our experts on hand 24/7/365.

Customer Focused. Results Driven.

Since 1977, Scallon Controls has been providing tailored solutions for firms in Southeast Texas through superior service and quality products. Our mission is to provide outcomes that contribute to your enterprise in the areas of safety, efficiency, and reliability.

Scallon Controls is your local go-to control systems integrator.

As a leader in the process management industry, Scallon renders personalized service, systems integration and product resolutions for the control room or the field—all while striving to develop long-term relationships based on mutual trust.

35 Years and Growing

Our 2014 18,000 sq.ft. addition has enhanced Scallon Controls commitment to systems integration services as well as expanded panel fabrication capability. The state-of-the-art structure includes a 10 ton overhead crane to assist in large control valve assembly, the only local dedicated Factory Acceptance Testing site in Beaumont, and generous capacity to manage sizeable Remote Instrument Enclosure (RIE) projects. Along with increased capacity for sales and execution of DeltaV, DeltaV SIS and Emerson Smart Wireless projects, the building enables more than \$1M of additional DeltaV, DeltaV SIS, Fisher Control Valves, On/Off Valves and Actuators, and Smart Wireless Instrumentation inventory.

Scallon provides the right combination of products and services to create solutions as unique as your process:

- Refining
- Chemical
- Petrochemical
- Pulp & Paper
- Power
- LNG
- Oil & Gas
- Midstream
